

Environmental Protection Agency

Notice to the Public

Esso Exploration and Production Guyana Limited (EEPGL) has submitted an Application to the Environmental Protection Agency (EPA) for Environmental Authorisation to undertake Liza Phase 2 Development Facilities for Petroleum Production estimated to last at least twenty (20) years in the Stabroek License Area, Offshore, Guyana.

The proposed project will be implemented in multiple stages, which include the following activities: drilling of development wells (35-40); mobilization and installation of subsea equipment, umbilicals, risers and flowlines (SURF); installation of a floating production, storage and offloading (FPSO) facility; production operations; and decommissioning. The proposed project will be undertaken in the deepwater marine environment offshore within Guyana's territorial waters and would require supporting shore-based facilities. As a result of the intended proposed development activities, it has been determined that there may be possible significant socio-economic and environmental effects, which may include impacts on marine water quality, air quality, and marine fauna, among others.

In keeping with the Environmental Protection Act, Cap. 20:05, Laws of Guyana, an Environmental Impact Assessment (EIA) is required for this offshore large-scale Development of Petroleum Production Facilities for Petroleum Production Project before any decision to approve or reject this proposed project is taken.

Members of the public are hereby invited, within twenty-eight (28) days of this Notice, to make written submissions to the Agency, setting out those questions and matters, which they require to be answered or considered in the Environmental Impact Assessment.

A summary of the project can be viewed on the EPA's website or uplifted at the Office mentioned below, at a reasonable cost of photocopying.
